CHAIRMAN'S LETTER

Dear Ebony Energy Shareholder,

On behalf of the Hexagon Board, I am pleased to present you with this compelling Offer to acquire all of Your Ebony Energy Shares. If you accept the Offer you will receive 1 Hexagon Share for every 1.32 of Your Ebony Energy Shares.

The Ebony Energy Directors unanimously recommend that Ebony Energy Shareholders accept the Offer, in the absence of a Superior Proposal. As at the date of this Bidder's Statement, Hexagon's offer is the only offer that has been made for Ebony Energy Shares.

The Offer extends to Ebony Energy Shares that are issued during the period from the Register Date to the end of the Offer Period (inclusive) as a result of the exercise or conversion of Ebony Energy Options or Ebony Energy Convertible Notes on issue at the Register Date that confer rights to be issued Ebony Energy Shares.

Our Offer for Your Ebony Energy Shares has been structured so that you receive an attractive valuation for Your Ebony Energy Shares and gain liquidity, whilst also retaining exposure to the Pedirka Project. By accepting the Offer and becoming a Hexagon Shareholder, you will also become a part owner of the assets owned by Hexagon which, combined with the Pedirka Project, which we believe is an attractive opportunity.

The Offer is subject to a limited number of conditions including that Ebony Energy's Assets are maintained in their current form, and that there are no "prescribed occurrences" or material adverse changes. We advise that the Offer is subject to a minimum acceptance threshold of 50.1%. A full list of the bid conditions is provided in section 12.8 of this Bidder's Statement.

Background and Rationale for the Offer

Hexagon's current projects comprise the McIntosh Project and the Halls Creek Project. Hexagon also has an interest, through Charge Minerals LLC (USA) (**Charge Minerals**), in the Ceylon Mine Graphite Project in Alabama. Further details regarding the Projects are provided at section 4.3 of this Bidder's Statement.

Hexagon considers that the Takeover Bid provides an opportunity for Hexagon to continue its strategy, as described in Hexagon's latest Quarterly Activity and Cashflow Report, of seeking ways in which Hexagon can progress value-added businesses that are consistent with its strategy, skill set and focus on energy materials and clean energy.

Hexagon is of the view that the Pedirka Project is consistent with its strategy to become a diversified minerals explorer with a focus on clean energy opportunities.

The Hexagon Directors consider the following as the advantages of the Takeover Bid.

- (a) the Takeover Bid furthers Hexagon's ability to continue its strategy to become a diversified minerals explorer with a focus on clean energy opportunities;
- (b) the Takeover Bid provides exposure to the rapidly developing hydrogen market; and
- (c) the Takeover Bid creates a greater profile in capital markets due to its larger market capitalisation and greater scale and diversity of Hexagon's operations, widening the range of potential investors for Hexagon and providing a greater ability to source equity funding on more favourable terms.

Compelling Offer for Ebony Energy Shareholders

By accepting the Offer you will become a shareholder in a company with asset diversification and very attractive growth prospects¹. The Hexagon Board invite Ebony Energy Shareholders to be part of our exciting growth strategy.

Hexagon believes the Offer made to Ebony Energy Shareholders is attractively priced and designed to provide liquidity in the form of Hexagon Shares while retaining ongoing exposure to the share price upside Hexagon believes may be generated through the proposed transaction.

¹ If you are a Foreign Ebony Energy Shareholder or Unmarketable Parcel Shareholder, you will not receive Hexagon Shares as part of the Offer Consideration. Please see sections 11.10 and 12.7 of this Bidder's Statement for further details.

I urge you to ACCEPT the Offer as soon as possible and take the opportunity to be part of an established, rapidly growing, diversified exploration and development company with strong future growth prospects.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'C Whitfield', with a stylized flourish at the end.

Charles Whitfield

Chairman
Hexagon Energy Materials Limited

1. WHY YOU SHOULD ACCEPT THE OFFER

1.1 The Ebony Energy Directors unanimously recommend Ebony Energy Shareholders accept the Offer, in the absence of a Superior Proposal

The Ebony Energy Directors unanimously recommend Ebony Energy Shareholders accept the Offer in absence of a Superior Proposal.

The Offer provides Ebony Energy Shareholders with the ability to retain exposure to the Pedirka Project while receiving an attractive valuation for Your Ebony Energy Shares and becoming part of a broader mineral exploration and development company with a focus on resources, energy related materials and clean energy at a consideration of 1 share in Hexagon for every 1.32 shares in Ebony Energy.

1.2 If the Offer becomes or is declared unconditional, you will become a shareholder² and have the opportunity to benefit from strategic benefits and diversity in the Merged Group

The Hexagon Board and management team has a significant depth of experience in the resources sector including all aspects of financing, exploration, development and operations. This team has established a strong track record of delivery on its core growth objectives and built Hexagon into a successful mineral exploration company.

The merger is expected to result in a significantly enhanced ability to fund exploration and development activities on the expanded portfolio, including the Pedirka Project which is currently in an unlisted public company.

Through Hexagon's listing on the ASX, and greater scale and diversity of the Merged Group's operations, the profile of the Merged Group is expected to be raised in capital markets and therefore widen the range of potential investors for the Merged Group. As such, there is expected to be a greater ability to source equity funding on more favourable terms than would currently be available to Ebony Energy, thereby reducing reliance on Ebony Energy Shareholders to continue funding its business.

1.3 You will gain ASX share trading liquidity (subject to the Offer becoming or being declared unconditional)

If successful, the Offer will ensure Ebony Energy and the Pedirka Project achieve access to Hexagon's listing on the ASX. An alternative listing of Ebony Energy on the ASX via an initial public offer would not be guaranteed. With no other emerging Superior Proposal, the Offer from Hexagon represents a significantly de-risked route towards publicly listing of Ebony Energy Shareholders' current investment.

As noted above, the merger will result in Ebony Energy Shareholders sharing in the many advantages that are anticipated to come from being a shareholder in a larger company with an expanded shareholder base and an existing listing on ASX.

1.4 The conditions of the Offer are limited

The Offer is subject to a limited number of conditions, including that Ebony Energy's Assets are maintained in their current form, that there being no "prescribed occurrences" or material adverse changes and Hexagon having at least 50.1% of the Ebony Energy Shares on issue at the end of the Offer Period.

The level of conditionality should provide Ebony Energy Shareholders with a high level of certainty that they will receive consideration for their Ebony Energy Shares following their acceptance of the Offer.

Please see section 12.8 for a full list of the conditions to the Offer.

1.5 Removes possible minority shareholder risks

If you do not accept the Offer and Hexagon acquires a majority of Ebony Energy Shares but does not become entitled to compulsorily acquire your Ebony Energy Shares, you will become a minority shareholder in Ebony Energy with reduced influence in the running of the business.

² If you are a Foreign Ebony Energy Shareholder or an Unmarketable Parcel Shareholders, you will not receive Hexagon Shares as part of the Offer Consideration. Please see section 11.10 and 12.7 of this Bidder's Statement for further details.

In this scenario, decisions made in respect of the business of Ebony Energy under the control of Hexagon may impact those Ebony Energy Shareholders who do not accept the Offer.

Please see section 8 of this Bidder's Statement for further information regarding Hexagon's intent regarding Ebony Energy.

1.6 The likelihood of a counterbidder emerging with a Superior Proposal is considered low

The proposed Offer was announced to the market on 21 December 2020. As at the date of this Bidder's Statement, no Competing Proposal or Superior Proposal has emerged.

In the event that the Ebony Energy Board does determine that a Competing Proposal is a Superior Proposal, Hexagon has a right to be notified of the Competing Proposal and a right to match any Superior Proposal.

1.7 You may be eligible for capital gains tax rollover relief

Ebony Energy Shareholders may have access to scrip for scrip rollover relief, in which case you will not incur capital gains tax (**CGT**) as a result of accepting the Offer. Should the Offer be successful and result in Hexagon acquiring a Relevant Interest in 80% or more of the voting shares in Ebony Energy as at the close of the Offer Period, Ebony Energy Shareholders who would otherwise make a capital gain from the disposal of their Ebony Energy Shares pursuant to the Offer may be able to choose to obtain full scrip for scrip rollover relief.

If scrip for scrip rollover relief is available and is chosen by Ebony Energy Shareholders who would otherwise have made a capital gain on the disposal of their Ebony Energy Shares under the Offer, all of the capital gain from the disposal may be disregarded.

However, Ebony Energy Shareholders may be subject to capital gains tax as a result of a later taxable event (such as a disposal) happening to the Hexagon Share received as consideration under the Offer.

Please refer to section 13 of this Bidder's Statement for further information.

2. HOW TO ACCEPT THE OFFER

Please refer to section 12.3 of this Bidder's Statement and your personalised Acceptance Form (which accompanies this Bidder's Statement) for full details on how to accept the Offer.

You may accept the Offer only in respect of all of Your Ebony Energy Shares.

Your acceptance must be received by no later than 5.00 pm (WST) on 19 March 2021, unless the Offer is extended or withdrawn.

If you have any questions about how to accept the Offer please call the Offer Information Line on 1300 288 664 (within Australia) or +61 2 9698 5414 (outside Australia), Monday to Friday between 9am and 5pm (WST).

Hexagon has been listed since 30 October 2008 under various names, the ASX code is "HXG". Hexagon has announced a clear and consistent strategy to develop its key Projects with Hexagon looking to accelerate its exploration programmes for the Projects.

In the past 2 years Hexagon has spent approximately \$3.4 million on the Projects, with a similar rate of expenditure (pro rata) planned for the next 12 months.

4.2 Structure and Ownership of Hexagon

An overview of the corporate structure of Hexagon is set out below:

As at 15 February 2021, Hexagon had 1,858 registered shareholders, with the Top 20 shareholders owning 48.52% of Hexagon. See section 5.6 of this Bidder's Statement for a list of the substantial shareholders of Hexagon.

4.3 Hexagon' principal operations and projects

Hexagon's current projects comprise the following:

(a) McIntosh Project

The McIntosh Project involves sixteen tenements spanning approximately 550km² in the East Kimberley region of Western Australia. Hexagon's main activities in recent years has been to define significant graphite JORC Code compliant Mineral Resources, complete a prefeasibility study (PFS) on mining and processing graphite into a flake concentrate and also downstream test work on graphite concentrates to examine opportunities for vertical integration to capture additional value. Hexagon has recently engaged an independent consulting group to review the Project's potential to host other base and precious metal deposits in addition to the existing graphite Mineral Resources.

This work indicated the McIntosh project, with its rare combination of a consolidated large land package spread across highly prospective geology with abundant mineralised surface occurrences, warranted further investigation. Hexagon is now examining whether this East Kimberley province has the right criteria to host world-class deposits. Hexagon is currently planning exploration on the project to be undertaken in 2021.

(b) Halls Creek Project

The Halls Creek Project involves thirteen granted tenements spanning approximately 657km², hosting known gold and base metal surface mineralisation. In December 2019, Hexagon completed a detailed aeromagnetic survey and target generation program. This survey and programme identified major regional structures controlling the location of new targets and providing geological context to enable the ranking of pre-existing targets. Geophysical survey and interpretational work have greatly enhanced the commercial and technical appeal of the Halls Creek Project. Hexagon recently completed surface geochemical sampling and has defined significant new gold-in-soil anomalies at the Bent Ridge and Golden Crown South prospects which are planned to be followed up in the 2021 field season.

(c) **Charge Minerals LLC (USA)**

Charge Minerals LLC (USA) is an 80% subsidiary of Hexagon which holds the Ceylon Mine Graphite Project in Alabama. Detailed mapping and sampling programs were completed culminating in a preliminary metallurgical test work programme. Charge Minerals LLC., through its US based director, is continuing to assess 'energy materials' related opportunities in the US including rare earths and lithium.

(a) Introduction

The Hexagon Shares issued as part of the Offer Consideration under the Offer will be issued fully paid and will rank equally for dividends and other rights in all respects with all existing Hexagon Shares from the date of issue.

Hexagon will apply for the Hexagon Shares to be issued under the Offer to be quoted on the ASX within 7 days after the date of this Bidder's Statement. Quotation of these Hexagon Shares will not be automatic but will depend on the ASX exercising its discretion. However, as Hexagon is already admitted to the official list of the ASX and Hexagon Shares in the same class as those to be issued under the Offer are already quoted, Hexagon believes quotation of the new Hexagon Shares will be granted. In accordance with the Corporations Act, the quotation of the Hexagon Shares to be issued under the Offer is a condition to the Offer under section 12.11 of this Bidder's Statement.

Since the Hexagon Shares issued as part of the Offer Consideration under the Offer will be issued credited as fully paid, no monetary liability attaches to them.

The rights and liabilities attaching to the Hexagon Shares which will be issued as part of the Offer Consideration under the Offer are set out in Hexagon's constitution (**Hexagon Constitution**) and in the Corporations Act. Under section 140(1) of the Corporations Act, the Hexagon Constitution has effect as a contract between Hexagon and each member and between a member of Hexagon and each other member. Accordingly, if you accept the Offer and are issued Hexagon Shares you will, as a result, become liable to comply with the Hexagon Constitution.

The main rights and liabilities attaching to the Hexagon Shares are summarised below. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Hexagon Shareholders.

Each member is entitled to receive notice of, and to attend and vote at, general meetings of Hexagon and to receive all notices, accounts and other documents required to be sent to members under the Hexagon Constitution, the Corporations Act or the Listing Rules.

(c) **Voting**

Subject to any rights or restrictions for the time being attached to any class or classes of shares whether by the terms of their issue, the Hexagon Constitution, the Corporations Act or the Listing Rules, at a general meeting of Hexagon every holder of fully paid ordinary shares present in person or by a representative, proxy or attorney has one vote on a show of hands and every such holder present in person or by a representative, proxy or attorney has one vote per share on a poll. A person who holds an ordinary share which is not fully paid is entitled, on a poll, to a fraction of a vote equal to the proportion which the amount paid bears to the total issue price of the share. Where there are two or more joint holders of the share and more than one of them is present at a meeting and tenders a vote in respect of the share (whether in person or by proxy or attorney), Hexagon will count only the vote cast by the member whose name appears before the other(s) in Hexagon's register of members.

(d) **Issues of Further Shares**

The Directors may, on behalf of Hexagon, issue, grant options over or otherwise dispose of unissued shares to any person on the terms, with the rights, and at the times that the Directors decide. (e) **Variation of Rights**

At present, Hexagon only has only one class of shares on issue, namely ordinary shares. The rights attached to the shares in any class may be altered only by a special resolution of Hexagon and a special resolution passed at a separate meeting of the holders of the issued shares of the affected class, or with the written consent of the holders of at least three quarters of the issued shares of the affected class.

(f) **Transfer of Shares**

Subject to the Hexagon Constitution, the Corporations Act, the ASX Settlement Operating Rules and the Listing Rules, ordinary shares are freely transferable. The shares may be transferred by a proper transfer effected in accordance with ASX Settlement Operating Rules, by any other method of transferring or dealing introduced by ASX and as otherwise permitted by the Corporations Act or by a written instrument of transfer in any usual form or in any other form approved by the Directors that is permitted by the Corporations Act. Hexagon may decline to register a transfer of shares in the circumstances described in the Hexagon Constitution and where permitted to do so under the Listing Rules. If Hexagon declines to register a transfer, Hexagon must give the lodging party written notice of the refusal and the reasons for refusal. The Hexagon Directors must decline to register a transfer of shares when required by law, by the Listing Rules or by the ASX Settlement Operating Rules.

(g) **Dividends**

Subject to the Corporations Act, the Hexagon Directors may determine that a dividend is payable and fix the amount, the time for payment and the method of payment. Dividends may be paid on shares of one class but not another and at different rates for different classes. Subject to the rights of members entitled to shares with special rights as to dividend (if any), all dividends in respect of shares (including ordinary shares) are to be declared and paid proportionally to the amount paid up or credited as paid up on the shares.

(h) **Winding Up**

Subject to the rights of holders of shares with special rights in a winding up, if Hexagon is wound up, members (including holders of ordinary shares) will be entitled to participate in any surplus assets of Hexagon in proportion to the amounts paid on their respective shares before the winding up began.

(i) **Dividend Plans**

6. PROFILE OF EBONY ENERGY AND EBONY ENERGY GROUP

6.1 Overview of Ebony Energy

(a) Ebony Energy overview and background

Ebony Energy is an Australian exploration and development company with a focus on exploring, advancing technical planning and ultimately developing its Pedirka Hydrogen Project (**Pedirka Project**) in the Northern Territory with the aim of supplying hydrogen and / or ammonia to global markets.

Ebony Energy was incorporated as Ebony Coal on 10 February 2011 and commenced activities as a private company. Ebony Energy has been an unlisted public company since 23 August 2011, having passed a special resolution to convert from a proprietary company and to adopt a new constitution for a public company.

(b) Activities and opportunities

Ebony Energy's main business activity and plan is to analyse, explore and (if justified) develop its sole asset, the Pedirka Project.

Hydrogen has been used for many years in the industrialised world, and its usage is growing. Hydrogen is considered an environmentally friendly, cost-effective source of energy which is beneficial given the ever-growing need for energy while not adding to carbon emissions when consumed.

With continual advances in fuel cell technology, and with a growing consensus that the use of hydrogen is a viable way to decarbonise industry, it is hoped that the Pedirka Project can take a role in the production of hydrogen in Australia. Hexagon believes that the large-scale adoption of hydrogen as a fuel source could provide a significant means of reducing global carbon output. Hexagon's proposed acquisition of the Pedirka Project is consistent with Hexagon's strategy to become a diversified minerals explorer, developer and operator with a focus on clean energy solutions.

In addition to being 'clean', hydrogen is a versatile energy source with applications across the transport, electricity, industrial and heating sectors. As described in Hexagon's announcement to the ASX on 21 December 2020, Research firm Markets & Markets estimates that the hydrogen market will expand from US\$135bn in 2018 to US\$199bn by 2023, with the highest compound annual growth rate in China, Japan and Korea.³

To date Ebony Energy's only activity at the Pedirka Project has been to undertake an early stage preliminary analysis of the Pedirka Project - no physical exploration activity has been undertaken at the Pedirka Project. This analysis included the completion in July 2020 of a preliminary conceptual 'desk-top' study with respect to how the Pedirka Project could be developed should activities justify such development. The study was used to analyse a surface gasification plant and hydrogen converter to produce 'clean' zero-emission 'blue' hydrogen.

In Hexagon's view, while there is significant further work to be undertaken with respect to analysing, exploring and (if justified) developing, the Pedirka Project, the project represents an exciting opportunity which will allow Hexagon to procure a potentially value adding business that is consistent with its strategy, skill set and focus on energy materials and clean energy.

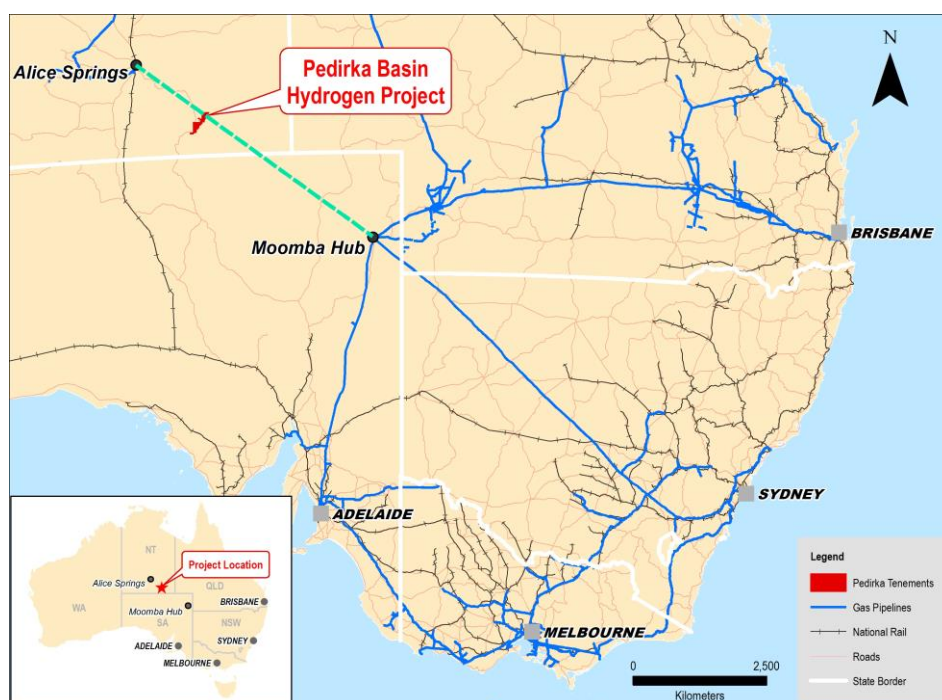

(c) Location

The Pedirka Project is located approximately 150km south east of Alice Springs in the Northern Territory, as shown in Figure 6.1.1 below. The Pedirka Project is located in the Pedirka Basin which covers approximately 796km².

It is understood that the coal geology of the Pedirka Basin is contained in the Upper Permian aged sediments of the Purni Formation and formed on top of the Devonian basement of marine sediments. The actual geological characteristics at the Pedirka Project would need to be the subject of exploration as contemplated in section 6.1(g).

Figure 6.1.1: Location the Pedirka Project⁴

(d) Tenure

Ebony Energy, through its wholly owned subsidiary Pedirka Basin Pty Ltd (ACN 604 326 516), holds two exploration licences over the area covering the Pedirka Project being, EL/29237 and EL/29239.

Further details of these exploration licences are provided in the table below:

Project	Tenement	End Date ⁵	Area (km ²)
Pedirka Project	EL/29237	Ongoing	475.07
Pedirka Project	EL/29239	Ongoing	321.11

(e) Technology

It is intended that, if developed, the Pedirka Project would utilise a conventional surface gasification plant to produce 'blue' hydrogen for export and domestic markets with 'clean' zero carbon emissions.

In order to do so, Ebony Energy would likely utilise the process of gasification, as well as hydrogen extraction and conversion.

The practice of coal gasification has been in use for decades in many countries and is well-developed.

Coal gasification is the process of producing syngas—a mixture consisting primarily of carbon monoxide (CO), hydrogen (H₂), carbon dioxide (CO₂), natural gas (CH₄), and water vapour (H₂O) - from coal and water, air and / or oxygen. The carbon monoxide is reacted with water to produce additional hydrogen. This method is the cheapest, most efficient, and most common.

⁴ The broken green line in Figure 1 represents the approximate path of a combined new and existing pipeline that may be developed for transport of CO₂ and/or Syngas, if further activities at the Pedirka Project justified the development of the Pedirka Project into production.

⁵ Each exploration licence is the subject of a renewal application lodged with the Northern Territory Department of Industry, Tourism and Trade on 29 December 2020 to renew the licence for a further 2 year period from 3 January 2021 until 3 January 2023. Under the Mineral Titles Act 2010 (NT), section 68, the exploration licences continue in force during the application period. Ebony Energy expects that both licences will be renewed in the coming months.

Gasification can occur on the surface (using a coal gasification plant) or underground. It is planned that the likely approach at the Pedirka Project would be to utilise a surface gasification plant. This would involve underground mining being used to extract any coal that may be found, transport it to the surface and feed it into the coal gasification plant for the production of hydrogen.

(f) **Activities undertaken**

As noted above, Ebony Energy undertook a preliminary conceptual 'desk-top' study, which was completed in July 2020, to analyse potential mining of any coal deposits at the Pedirka Project to feed a surface gasification plant and hydrogen converter to produce 'clean' zero-emission 'blue' hydrogen. While Ebony Energy has progressed other aspects of the potential business, it has not undertaken any further feasibility activities, including any exploration activity, at the Pedirka Project site prior to or following the conceptual study.

With respect to any potential coal mineralisation at the Pedirka Project, the 2020 conceptual study considered, in part, previous analysis undertaken for Ebony Energy in a similarly 'high-level' conceptual study dated December 2013.

The 2013 study considered information gathered from activities undertaken by other entities on tenements surrounding the Pedirka Project in the Pedirka Basin.

In preparing the 2013 study, Ebony Energy reviewed this analysis and extrapolated the information in an attempt to assess the possible presence of coal mineralisation at the Pedirka Project. The 2020 study then assessed potential mining options if coal mineralisation were confirmed at sufficient levels to justify development.

The 2013 study noted that drill holes at the Pedirka Project would be necessary to confirm any presence of coal mineralisation. To date, there has been no exploration at the Pedirka Project to provide any JORC-compliant statement with respect to its exploration potential (including any exploration target).

It is uncertain whether exploration results will be able to be reported in accordance with the JORC code. The only work that has been completed in respect of the Pedirka Project to date are the preliminary conceptual studies.

The intention of the Merged Group is to conduct the work described in paragraph 6.1(g) below as its next steps.

(g) **Future plans**

The next stage in relation to the Pedirka Project would be to progress from the current preliminary conceptual stage by financing and undertaking the development and then execution of a drilling program with the aim of establishing a maiden JORC 2012 compliant Mineral Resource as part of a pre-feasibility study (**PFS**) program.

A successful Takeover Bid would allow the Merged Group to finance, develop and then execute a drilling programme for the Pedirka Project during the proposed PFS activities. As part of the progression of the PFS, the Merged Group would discuss future financing and off-take with interested parties. Upon the completion of a positive PFS, it is expected that a full partnership with a gasification group would be entered into, to provide engineering expertise and related financing.

Other activities, beyond developing and executing the drilling programme and analysis of results, that will be required to be undertaken in order to progress a PFS include:

- (i) technical and financial feasibility of developing the aspects of infrastructure that are listed in this section 6.1(g) and the preferred options for each (including regulatory approvals required);
- (ii) generate expected capital expenditure and operating expenditure; and
- (iii) life of project cash flow analysis.

With respect to the Pedirka Project itself, given the limited amount of activity that has been undertaken with respect to it, as is noted above, there are several aspects of infrastructure

that would need to be completed in order to be able to transport the hydrogen from the Pedirka Project. These include, among others:

- (i) a hydrogen gasification plant, complete with gasifier and hydrogen plant;
- (ii) a rail link between the south of Alice Springs to the Pedirka Project;
- (iii) a slurry pipeline from the Pedirka Project to Alice Springs possibly powered by intermediate solar stations;
- (iv) a power plant based at the Pedirka Project;
- (v) a power plant for mining and dewatering operations at the Pedirka Project; and
- (vi) road works, conveyors and settling ponds at the Pedirka Project.

Whilst Hexagon acknowledges that there is a significant amount of work that would be required to establish a JORC compliant indicated Mineral Resource, Hexagon considers that there is significant potential at the Pedirka Project notwithstanding its infancy.

Subject to securing financing, Merged Group would propose to spend approximately \$1.5 million on developing and then executing a drill program that would (if successful) underpin a PFS. Hexagon plans to undertake such works whilst advancing its other existing Projects with the next 6 months.

Subject to securing financing, the Merged Group would propose to spend approximately \$1.0 million on developing and then executing a drill programme that would (if successful) underpin a PFS and a further \$1.5 million on the activities to complete the PFS.

Hexagon plans to undertake the drilling programme within 8 months of completing the Takeover Bid, while advancing the PFS. Subject to a positive outcome from the drilling programme, Hexagon plans to finalise the PFS within 18 months of completing the Takeover Bid.

6.2 Ebony Energy's Mineral Resources and Ore Reserves

Ebony Energy does not currently have a Mineral Resource or Ore Reserve. As noted in section 6.1, the next stage for Ebony Energy would be to finance and undertake a PFS (including a drill program) to establish a Mineral Resource at the Pedirka Project for advancing that project.

As noted above, if the Offer is successful, Hexagon proposed to spend approximately \$1.5 million on developing and executing a drill program to underpin a PFS.

8. HEXAGON'S INTENTIONS IN RELATION TO EBONY ENERGY

8.1 Overview

The following apply in relation to all of Hexagon's statements of intention.

⁷ Drumrock Capital Advisory is an entity associated with Hexagon's Chairman, Charles Whitfield.

- (a) Hexagon's current intentions are summarised in this Bidder's Statement. To the extent that any of the intentions set out in this Bidder's Statement change materially before the close of the Offer as a result of new information coming to the attention of Hexagon, Hexagon will make supplementary disclosure about such material change to the extent such disclosure is necessary.
- (b) The business of Ebony Energy will be continued in substantially the same manner as it is presently being conducted, noting that (as described in section 6.1(g)) the Merged Group is likely to focus its activities on progressing the current conceptual stage by financing and undertaking the development and then execution of a drilling program with the aim of establishing a JORC compliant indicated Mineral Resource as part of a pre-feasibility study (PFS) program.. No other major changes will be made to the business of Ebony Energy and there will not be any deployment of the fixed assets of Ebony Energy.
- (c) The implementation of Hexagon's intentions in the event that Hexagon has a Relevant Interest in less than 100% of Ebony Energy Shares will be subject to the Corporations Act (including those provisions intended for the protection of minority shareholders), the Listing Rules, the Ebony Energy constitution and the statutory and fiduciary obligations of the Ebony Energy Directors at that time to act in the best interests of Ebony Energy and all Ebony Energy Shareholders, as well as the extent of Hexagon's representation on the Ebony Energy Board, and its shareholding at the relevant time. The extent of Hexagon's representation on the Ebony Energy Board together with its shareholding in Ebony Energy (at the close of the Offer) will determine the regulatory requirements for, and other practical matters associated with, implementing Hexagon's intentions.
- (d) Hexagon and its associates may also be excluded from voting on certain resolutions in general meeting, and Hexagon's nominee directors may potentially be precluded from voting at Ebony Energy Board meetings, to the extent of any conflict of interest. Further, in circumstances where a minority shareholder maintains a "blocking stake" or other substantial holding in Ebony Energy which provides them with a significant proportion of the Ebony Energy shares which are not held by Hexagon, then that shareholder's ability to determine the outcome of any such resolutions put to Ebony Energy Shareholders in general meeting may be disproportionate to its holding (for example, where that shareholder's holding in Ebony Energy is such that they alone could determine whether a resolution is passed or not, in circumstances where Hexagon and its associates are excluded from voting on that resolution).

8.2 Employees and directors of Ebony Energy

Employees

As a result of implementing Hexagon's intentions (as set out in this section, section 6.1(g) and dependent on Hexagon's shareholding in Ebony Energy at the time), it is possible that some employees, including those in senior management positions, may have their roles made redundant or the need for change in personnel identified. Any Ebony Energy employees impacted by the actions implemented by Hexagon will be treated in accordance with their contractual and other legal rights.

Ebony Energy Board

Hexagon will use its reasonable endeavours to ensure that any nominees of Hexagon to the Ebony Energy Board comply with their obligations and duties under the Corporations Act, the Listing Rules and Ebony Energy's constitution. Consistent with these obligations and duties, Hexagon's nominee directors may be potentially precluded from voting on resolutions before the Ebony Energy Board to the extent of any conflict of interest or material personal interest that arises in respect of the subject matter of those resolutions.

In a scenario where Hexagon controls Ebony Energy, but holds less than 100%, it would seek representation on the Ebony Energy Board. Necessarily, that objective may involve the replacement of some or all of the existing Ebony Energy Directors. The identity of any such existing Ebony Energy Directors would be determined at the relevant time.

The identity of the Hexagon nominees has not yet been determined but, it is expected that they will predominantly be drawn from the current directors and management of Hexagon.

8.3 Intentions if Hexagon acquires a Relevant Interest in 90% of more of Ebony Energy Shares

Set out below are Hexagon's intentions if Hexagon acquires a Relevant Interest in 90% or more of Ebony Energy Shares.

If during, or at the end of, the Offer Period:

- (a) Hexagon and its associates together have Relevant Interests in at least 90% (by number) of all the Ebony Energy Shares; and
- (b) Hexagon and its associates have acquired at least 75% (by number) of the Ebony Energy Shares for which the Offers are made under the Offer,

Hexagon will be entitled to compulsory acquire all outstanding Ebony Energy Shares and presently intends to do so. Following completion of such compulsory acquisition process, Ebony Energy would be a wholly-owned Subsidiary of Hexagon and Hexagon would be entitled to exercise its rights as the sole shareholder of Ebony Energy.

Ebony Energy Assets

As described at section 6.1(g) above, the next stage in relation to the Pedirka Project would be to progress from the current conceptual stage by financing and undertaking the development and then execution of a drilling program with the aim of establishing a JORC compliant indicated Mineral Resource as part of a pre-feasibility study (**PFS**) program.

As part of the progression of the PFS, Hexagon would discuss future financing and off-take with interested parties. Upon the completion of a positive PFS, it is expected that a full partnership with a gasification group would be entered into, to provide engineering expertise and related financing.

Further, given the limited amount of activity that has been undertaken with respect to the Pedirka Project, there are several aspects of infrastructure that would need to be completed in order to be able to transport the hydrogen from the Pedirka Project. These include, among others:

- (a) a hydrogen gasification plant, complete with gasifier and hydrogen plant;
- (b) a rail link between the south of Alice Springs to the Pedirka Project;
- (c) a slurry pipeline from the Pedirka Project to Alice Springs possibly powered by intermediate solar stations;
- (d) a power plant based at the Pedirka Project;
- (e) a power plant for mining and dewatering operations at the Pedirka Project; and
- (f) road works, conveyors and settling ponds at the Pedirka Project.

Subject to securing financing Hexagon proposes to spend approximately \$1.5 million on developing and then executing a drill program that would (if successful) underpin a PFS.

Compulsory Acquisition of Ebony Energy Shares

If, as a result of the Offer, Hexagon becomes entitled to compulsorily acquire outstanding Ebony Energy Shares or securities convertible into Ebony Energy Shares under the Corporations Act, Hexagon presently intends to proceed with compulsory acquisition of those securities.

Ebony Energy Board

Hexagon currently intends to replace all members of the Ebony Energy Board with its own nominees. The identity of such nominee directors has not yet been finally determined, but it is expected they will be drawn from the current directors and management of Hexagon and Ebony Energy.

Future employment of Ebony Energy current employees

In the short-term, Hexagon intends to retain the Ebony Energy employees (noting that there are currently no Ebony Energy employees who are employed outside of the executive management) who

will continue to be responsible for the day-to-day management and operations of the Pedirka Project. However, it is possible that some employees may have their roles made redundant or the need for change in personnel identified. Any Ebony Energy employees impacted by the actions implemented by Hexagon will be treated in accordance with their contractual and other legal rights.

8.4 Intentions for Ebony Energy as a part-owned controlled entity

Set out below are Hexagon's current intentions if, at the end of the Offer Period, Hexagon has a Relevant Interest of more than 50%, but less than 90%, of all of the Ebony Energy Shares.

Hexagon would have a controlling interest in Ebony Energy and will be actively involved in influencing the strategic direction of the business of Ebony Energy to the greatest extent permitted by law.

If Hexagon acquires more than 50% of Ebony Energy Shares (but less than 90%), it will be able to determine alone the outcome of ordinary resolutions (in respect of which it is entitled to vote) and will be in a position to control the composition of the Ebony Energy Board. However, in these circumstances, the provisions of the Corporations Act, the Listing Rules, the Ebony Energy constitution and the statutory and fiduciary obligations of the Ebony Energy Directors will continue to apply. If Hexagon acquires at least 75% of Ebony Energy Shares (but less than 90%), it will also be able to determine the outcome of special resolutions (in respect of which it is entitled to vote). Such special resolutions could involve amendments to the Ebony Energy constitution or a change to company type. However, again, the shareholder protections mentioned above would continue to be applicable.

Ebony Energy Board

In these circumstances, Hexagon intends to (subject to the formal requirements of the Corporations Act and of the Ebony Energy constitution) procure the appointment of a majority of Hexagon nominees to the Ebony Energy Board.

The identity of such nominee directors has not yet been finally determined, but it is expected that they will be predominantly drawn from the current directors and management of Hexagon.

Operations, assets and employees

Hexagon will seek, to the extent possible and appropriate in the circumstances, to, as has been detailed above in this Bidder's Statement, progress from the current conceptual stage by financing and undertaking the development and then execution of a drilling program with the aim of establishing a JORC compliant indicated Mineral Resource as part of a pre-feasibility study (PFS) program.

Further acquisition of Ebony Energy Shares

Any future purchases of Ebony Energy Shares by Hexagon will depend upon the level of acceptances achieved under the Offer and all other relevant circumstances at the time. Hexagon reserves its rights to, but makes no commitment to, further acquisitions of Ebony Energy Shares following completion of the Offer in any manner permitted by the Corporations Act.

8.5 Intentions if Hexagon acquires a Relevant Interest in less than 50.1% of Ebony Energy Shares

Set out below are Hexagon's current intentions if, at the end of the Offer Period, Hexagon has a Relevant Interest in less than 50.1% of all Ebony Energy Shares and Hexagon decides to proceed with acquiring a Relevant Interest in those Ebony Energy Shares notwithstanding the bid condition described at section 12.8(a).

In this situation, Hexagon may be in a position to influence but not necessarily determine the outcome of ordinary resolutions (in respect of which it is entitled to vote) and so, for example, it may not be in a position to control the composition of the Ebony Energy Board.

Ebony Energy Board

In these circumstances, Hexagon intends, subject to the formal requirements of the Corporations Act and of the Ebony Energy constitution, to seek representation on the Ebony Energy Board.

The identity of such nominee directors has not yet been finally determined, but it is expected that they

will be predominantly drawn from the current directors and management of Hexagon and Ebony Energy.

Active minority Ebony Energy Shareholder

In these circumstances, Hexagon intends to remain actively involved as a shareholder, including by way of influencing the strategic direction of the business of Ebony Energy, to the greatest extent permitted by law.

Limitations in giving effect to intentions

The implementation of Hexagon's intentions in the event that Hexagon has a Relevant Interest in less than 100% of Ebony Energy Shares will be subject to the Corporations Act, the Listing Rules, Ebony Energy's constitution and the obligations of the Ebony Energy Directors at that time to act in the best interests of Ebony Energy and all Ebony Energy Shareholders, and the extent of Hexagon's shareholding at the relevant time.

Further acquisition of Ebony Energy Shares

Any future purchases of Ebony Energy Shares by Hexagon will depend upon the level of acceptances achieved under the Offer and all other relevant circumstances at the time. Hexagon reserves its rights to acquire, but makes no commitment to acquire, further Ebony Energy Shares following completion of the Offer in any manner permitted by the Corporations Act.

9. EFFECT OF THE OFFER ON HEXAGON AND PROFILE OF THE MERGED GROUP

9.1 Introduction

This section 9 provides a description of the effect of the Offer on Hexagon and a profile of the Merged Group, assuming that Ebony Energy becomes a wholly-owned Subsidiary of Hexagon. If Hexagon does not acquire at least 90% of the Ebony Energy Shares during the Offer Period and therefore does not become entitled to compulsorily acquire the remainder of the Ebony Energy Shares, some of the benefits that would otherwise accrue to Hexagon if Ebony Energy were to become a wholly-owned Subsidiary of Hexagon may not be fully realised.

For further information in this regard please see sections 8.4 and 8.5 of this Bidder's Statement.

9.2 Synergies

Hexagon intends to conduct a review of Ebony Energy's operations on a financial level with a view to integrating Ebony Energy's operations into Hexagon's operational and corporate structure. This is likely to involve:

- (a) a consolidation of administrative and governance functions;
- (b) detailed review of the development plans for the Pedirka Project; and
- (c) review of the Ebony Energy exploration database and expenditure requirements and integration with the exploration activities of the Merged Group.

Each of these activities is likely to identify synergies that will result in cost savings for the Merged Group.

9.3 Prospects of the Merged Group

Hexagon will formalise a new management team to evaluate and develop its assets with a clean energy focus. The group will be advantaged by leveraged market exposure through its multiple projects in high growth sectors and clean energy.

The assets of the merged group include the:

- (a) McIntosh Project (described at section 4.3(a));
- (b) Halls Creek Project (described at section 4.3(b));
- (c) Ceylon Mine Graphite Project (described at section 4.3(c)); and
- (d) Pedirka Project (described at section 6.1).

With consolidated governance, resources and systems the merged group is well positioned for future growth as it advances its projects and creates shareholder value.

9.4 Effect of the Offer on Merged Group's Mineral Resources Information

No impact. As noted in section 6.1, the next stage for is the Merged Group would be to finance and undertake a PFS (including a drill program) to establish a Mineral Resource at the Pedirka Project for advancing that project.

Hexagon's most recent Mineral Resource results were last published in its December 2019 Quarterly Activities & Cash Flow Report, released to the ASX on 31 January 2020. Details are in section 4.4.

9.5 Effect of the Offer on the Merged Group's capital structure

Under the Offer, Hexagon is offering to issue Hexagon Shares to Ebony Energy Shareholders (other than Foreign Ebony Energy Shareholders).

Hexagon has the capacity to issue the maximum number of Hexagon Shares which it may be required to issue under the Offer. No shareholder approvals or third party consents are required for the issue of the Hexagon Shares.

The effect of the Offer on the capital structure of Hexagon on a post-completion basis is set out in the table below:

Securities	Numbers

An entity associated with Hexagon's Chairman, Charles Whitfield, is currently the holder of contingent liability rights with respect to Ebony Energy for accrued prior director and consulting fees, and out-of-pocket expenses. These rights have an audited book value in Ebony Energy's accounts as at 30 June 2020 of \$195,085.

(b) **Accounting treatment**

In the event that Hexagon acquires control of Ebony Energy (as determined in accordance with Australian Accounting Standards) but does not hold 100% of the issued capital, Hexagon will still consolidate 100% of the earnings, assets and liabilities of Ebony Energy. However, it will then make an adjustment in the Profit and Loss Statement and in the Equity section of the Balance Sheet of the Hexagon Group which effectively removes the proportion of the profits or losses and the net assets that it does not own (referred to as the minority interest).

In the event that Hexagon acquires a sufficient number of shares in Ebony Energy to exert a significant influence in the affairs of Ebony Energy (in accordance with Australian Accounting Standards) then Hexagon will undertake an Equity Accounting approach to its investment in Ebony Energy. This will involve recognising as an asset (at cost) the Hexagon investment in Ebony Energy. This amount is then adjusted for Hexagon's share of any profits or losses that Ebony Energy make in any particular period.

9.7 Forecast financial information for the Merged Group

Hexagon has given consideration as to whether a reasonable basis exists to produce reliable and meaningful information in relation to the Merged Group and has concluded that a reasonable basis does

not exist for producing forecasts that would be sufficiently meaningful and reliable. This is mainly due to the intention to conduct the Strategic Review and the fact that the Ebony Energy Assets (including the Pedirka Project) are at an early stage of development and a reasonable basis does not exist for forecasting production and cost guidance or financial information for these assets.

10. KEY RISKS ASSOCIATED WITH THE OFFER

10.1 Introduction

If the Offer becomes unconditional, Ebony Energy Shareholders who accept the Offer will become Hexagon Shareholders,⁸ and Hexagon will acquire a Relevant Interest in Ebony Energy. In that event, Ebony Energy Shareholders will continue to be indirectly exposed to the risks associated with having an interest in Ebony Energy's Assets and general economic, share market and industry risks. There are also additional risks relating to the Offer and the Merged Group, to which Ebony Energy Shareholders will be exposed through their holding of Hexagon Shares.

10.2 Risks specific to Hexagon

(a) Contractual and completion risk

The Takeover Bid is subject to certain conditions precedent being satisfied or waived. This includes Hexagon obtaining the Shareholder approval pursuant to the Hexagon Shareholder Approval. There is no assurance that this Shareholder approval will be obtained, in which case the transaction would not proceed. Should the transaction not complete, the monies paid or advanced by Hexagon in relation to the transaction may not be refunded.

(b) Additional Requirements for Capital

The capital requirements of Hexagon depend on a number of factors. Hexagon may require additional financing in the future. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If Hexagon is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations.

(c) Exploration and Development Costs

The exploration and development costs of Hexagon are based on certain assumptions with respect to the method and timing of exploration and development. By their nature, these estimates and assumptions are subject to significant uncertainties and, as a result, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect Hexagon's viability.

(d) Exploration and Development Success

Hexagon's (including, following the completion of the Takeover Bid, Ebony Energy's) tenements are at various stages of exploration and development, and potential investors should understand that mineral exploration and development are high-risk undertakings. There can be no assurance that exploration and development of the tenements, or any other licenses that may be acquired in the future, will result in the discovery of an economic ore deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.

(e) Mineral Resources Estimates

No assurance can be given that any Mineral Resources that are estimated by Hexagon will be recovered or that they will be recovered at the rates estimated. Mineral Resource estimates are based on limited sampling, and, consequently, are uncertain because the samples may not be representative. Mineral Resource estimates may require revision (either up or down) based on actual production experience. Any future Mineral Resource or Ore Reserve figures will be estimates and there can be no assurance that the minerals are present, will be recovered or that it can be brought into profitable production. Furthermore, a decline in the

⁸ If you are a Foreign Ebony Energy Shareholder, you will not receive Hexagon Shares as part of the Offer Consideration. Please see sections 11.10 and 12.7 of this Bidder's Statement for further details.

market price for natural resources that Hexagon may discover or invest in could render reserves containing relatively lower grades of these resources uneconomic to recover and may ultimately result in a restatement of reserves.

(f) **Operational risk**

Future mining operations of Hexagon may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration and mining, operational and technical difficulties encountered in mining, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment. The ability to procure feedstocks for any downstream operations is also a risk factor.

No assurances can be given that Hexagon will achieve commercial viability through the successful exploration and/or mining of its tenement interests.

(g) **Exploration risks**

Mining exploration and development is a high-risk undertaking. The success of Hexagon depends on the delineation of economically minable Mineral Resources and Ore Reserves, access to required development capital, movement in the price of commodities, securing and maintaining title to Hexagon's exploration and mining tenements and obtaining all consents and approvals necessary for the conduct of its exploration activities. Exploration of Hexagon's (and, following completion of the Takeover Bid, Ebony Energy's) existing mining tenements may be unsuccessful, resulting in a reduction of the value of those tenements and diminution in the cash reserves of Hexagon. The exploration costs of Hexagon are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that cost estimates and underlying assumptions will be realised in practice, which may materially and adversely affect Hexagon's viability.

(h) **Environmental**

The operations and proposed activities of Hexagon are subject to laws and regulations concerning the environment. As with most exploration projects and mining operations, Hexagon's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. It is Hexagon's intention to conduct its activities to the highest standard of environmental obligations, including compliance with all environmental laws.

Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events, such as unpredictable rainfall or bushfires may impact on Hexagon's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on Hexagon for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or non-compliance with environmental laws or regulations.

The disposal of mining and process waste and mine water discharge are under constant legislative scrutiny and regulation. There is a risk that environmental laws and regulations become more onerous making Hexagon's operations more expensive.

Approvals are required for land clearing and for ground disturbing activities. Delays in obtaining such approvals can result in the delay to anticipated exploration programmes or mining activities.

(i) **Mine development**

Possible future development of a mining operation at any of Hexagon's projects is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the

necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding, commodity prices volatility, securing off-take contracts for the product(s) and contracting risk from third parties providing essential services.

If Hexagon commences production, its operations may be disrupted by a variety of risks and hazards which are beyond its control, including environmental hazards, industrial accidents, technical failures, labour disputes, unusual or unexpected rock formations, flooding and extended interruptions due to inclement of hazardous weather conditions and fires, explosions or accidents. No assurance can be given that Hexagon will achieve commercial viability through the development or mining of its projects and treatment of ore.

(j) **Insurance risks**

Hexagon intends to insure its operations in accordance with industry practice. However, in certain circumstances, Hexagon's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of Hexagon.

Insurance against all risks associated with mining exploration and production is not always available and where available the costs can be prohibitive.

(k) **Commodity price volatility and exchange rate risks**

If Hexagon achieves success leading to mineral production or downstream processing operations, the revenue it will derive through the sale of commodities exposes the potential income of Hexagon to commodity price and exchange rate risks. Many factors influence the price of graphite, gold, nickel, copper and related commodities which are largely beyond the control of Hexagon. Such factors include supply and demand fluctuations in the global end-use industries for these materials, in particular:

- (i) for graphite, the steel industry, building and construction materials and energy storage and technical applications; and
- (ii) for the balance of the commodities general industrial applications and other macro-economic factors.

Other demand factors that present risk include possible substitution of graphite specifically for other materials or technological advances where these materials may no longer be required.

Supply aspects such as proposed new graphite projects, could also represent a risk to securing off-take contracts and assumed commodity prices.

Furthermore, international prices of various commodities are often denominated in United States dollars or another currency, whereas the income and expenditure of Hexagon are and will be taken into account in mainly Australian currency, exposing Hexagon to the fluctuations and volatility of the rate of exchange between the revenue currency such as the United States dollar and the Australian dollar as determined in international markets.

(l) **Tenure and access**

Mining and exploration tenements are subject to periodic renewal. There is no guarantee that current or future tenements or future applications for production tenements will be approved.

Hexagon's tenements are subject to the applicable mining acts and regulations in Western Australia. Ebony Energy's tenements are subject to the applicable mining acts and regulations in the Northern Territory.

The renewal of the term of a granted tenement is also subject to the discretion of the relevant minister. Renewal conditions may include increased expenditure and work commitments or compulsory relinquishment of areas of the tenements comprising Hexagon's projects. The imposition of new conditions or the inability to meet those conditions may adversely affect the operations, financial position and/or performance of Hexagon.

10.3 General Risks

(b) Trading Price of Shares

Hexagon's operating results, economic and financial prospects and other factors will affect the trading price of the Shares. In addition, the price of Shares is subject to varied and often unpredictable influences on the market for equities, including, but not limited to general economic conditions including, inflation rates and interest rates, variations in the general market for listed stocks, changes to government policy, legislation or regulation, industrial disputes, general operational and business risks and hedging or arbitrage trading activity that may develop involving the Shares.

In particular, the share prices for many companies have been and may in the future be highly volatile, which in many cases may reflect a diverse range of non-company specific influences such as global pandemics, hostilities and tensions relating to certain unstable regions of the world, acts of terrorism and the general state of the global economy. No assurances can be made that Hexagon's market performance will not be adversely affected by any such market fluctuations or factors.

(c) Litigation Risks

Hexagon is exposed to possible litigation risks including contractual disputes, occupational health and safety claims and employee claims. Further, Hexagon may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on Hexagon's operations, financial performance and financial position. Hexagon is not currently engaged in any litigation.

(d) Economic Risks

General economic conditions, movements in interest and inflation rates may have an adverse effect on Hexagon's activities, as well as on its ability to fund those activities.

Further, share market conditions may affect the value of Hexagon's securities regardless of Hexagon's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) interest rates and inflation rates;
- (iii) currency fluctuations;
- (iv) changes in investor sentiment toward particular market sectors (such as the exploration industry or the lithium sector within that industry);
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither Hexagon nor the Directors warrant the future performance of Hexagon or any return on an investment in Hexagon.

(e) Reliance on key personnel

The responsibility of overseeing the day-to-day operations and the strategic management of Hexagon depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on Hexagon if one or more of these employees cease their employment.

(f) Force Majeure

Hexagon, now or in the future, may be adversely affected by risks outside the control of Hexagon including labour unrest, civil disorder, war, subversive activities or sabotage, extreme weather conditions, fires, floods, explosions or other catastrophes, epidemics, pandemics or quarantine restrictions.

(g)

Acquisitions

As part of its business strategy, Hexagon may make acquisitions of, or significant investments in, companies, assets or projects complementary to Hexagon's existing operations. Any such future transactions are accompanied by the risks commonly encountered in making acquisitions of companies, assets and projects, such as integrating cultures and systems of operation, relocation of operations, short term strain on working capital requirements, achieving the short term operational goals and retaining key staff and customer and supplier relationships.

If a commission is offered, it will be payable to brokers only and subject to the condition that no part of the fee will be able to be passed on or paid to Ebony Energy Shareholders.

It is Hexagon's intention that, once an offer of commission has been made to any broker by Hexagon, the commission arrangement will remain in place for the balance of the Offer Period and the amount of the commission offered will not be increased during the Offer Period.

13. AUSTRALIAN TAX IMPLICATIONS

The following is intended only as a general guide to the income tax position under current Australian income tax law and administrative practice as at the date of this Bidder's Statement. Income tax is a complex area of law and the income tax implications for you may differ from those detailed below, depending on your particular circumstances. As these statements are of a general nature only it is highly recommended that you obtain your own independent professional advice in respect of the Australian income tax implications of the Offer.

The following is an overview of the likely Australian income tax implications as a consequence of the Takeover Bid for an Australian tax resident or non-Australian resident Ebony Energy Shareholders who hold their Ebony Energy Shares on capital account.

The following may not apply to certain Ebony Energy Shareholders, such as if you are a dealer in securities, you hold Ebony Energy Shares on revenue account or as trading stock, if you are an insurance company or a collective investment scheme, or if Division 230 of the Income *Tax Assessment Act 1997* (ITAA 1997) applies to you and you have made an election to apply certain methods to calculating gains and losses.

In addition, the following may not apply to you if you acquired your Ebony Energy Shares or Ebony Energy Options as a result of an employment or services arrangement. Such persons may be subject to special rules, or any gain on the exchange of their Ebony Energy Shares for Hexagon Shares may be assessed as ordinary income.

The following may also not apply to non-Australian tax resident Ebony Energy Shareholders. The Australian income tax implications for non-Australian resident Ebony Energy Shareholders are complex and will depend upon their own specific circumstances. Non-Australian tax resident Ebony Energy Shareholders may also have tax implications in their country of residence.

13.1 Australian tax resident Ebony Energy Shareholders

Capital gains tax

The transfer of Ebony Energy Shares to Hexagon pursuant to the Offer will trigger a capital gains tax (CGT) event for you. The income tax implications for you will depend on whether you receive Hexagon Shares and, if eligible, choose to obtain scrip-for-scrip roll-over relief under Subdivision 124-M of the ITAA 1997 in relation to the disposal of your Ebony Energy Shares. Broadly, you may choose to obtain scrip-for-scrip roll-over relief where Hexagon acquires the number of Ebony Energy Shares sufficient to bring its total interest in Ebony Energy to at least 80% of the voting shares in Ebony Energy and you:

- (a) receive Hexagon Shares in exchange for your Ebony Energy Shares;
- (b) acquired your Ebony Energy Shares on or after 20 September 1985; and
- (c) would, apart from the application of the roll-over, make a capital gain from the disposal of your Ebony Energy Shares.

Where scrip-for-scrip roll-over relief is chosen

Where the above conditions are met, Ebony Energy Shareholders who wish to obtain scrip-for-scrip roll-over relief must choose to obtain the roll-over relief.

Where scrip-for-scrip roll-over relief is chosen, any capital gain arising from the disposal of your Ebony Energy Shares will be disregarded and deferred until a CGT event occurs in respect of the Hexagon Shares acquired by you under the Offer. The CGT cost base and reduced cost base of each Hexagon Share received will be determined by apportioning, on a reasonable basis, the cost base and reduced cost base of your Ebony Energy Share.

If you can apply the discount capital gains tax rules in Division 115 of the ITAA 1997 and you choose scrip-for-scrip roll-over relief your Hexagon Shares will be taken to have been acquired at the time your Ebony Energy Shares were originally acquired for the purposes of applying the CGT discount rules.

Where a capital loss arises, you will not be eligible to obtain scrip-for-scrip roll-over relief.

Where scrip-for-scrip roll-over is not chosen

Where scrip-for-scrip roll-over relief is not chosen, you will make a capital gain equal to the market value of your Hexagon Shares you are entitled to less the CGT cost base of your Ebony Energy Shares.

In determining your capital gain, the market value of your Hexagon Shares should be determined using the market value of those shares on the date you cease to have ownership of your Ebony Energy Shares.

If you are an individual, trustee of a trust or superannuation fund, you may be entitled to concessional discount CGT treatment under Division 115 of the ITAA 1997 in respect of a capital gain. This will depend upon your individual circumstances.

If your reduced cost base of your Ebony Energy Shares is greater than the market value of your Hexagon Shares you are entitled to, you may realise a capital loss. A capital loss may be applied to reduce a capital gain in the same or a future tax year.

Where scrip-for-scrip roll-over relief is not chosen, the cost base of the Hexagon Shares will be equal to their respective market values, as determined on the date the relevant Hexagon Shares are allotted or issued.

Where scrip-for-scrip roll-over relief is not chosen, the acquisition date of the Hexagon Shares for CGT purposes will be the date on which the Hexagon Shares are allotted or issued to you.

13.2 Non-Australian resident Ebony Energy Shareholders

Non-Australian resident Ebony Energy Shareholders that hold Ebony Energy Shares on capital account would only be subject to Australian capital gains tax upon disposal of their Ebony Energy Shares where the following conditions are met:

- (a) the non-Australian resident Ebony Energy Shareholder, together with its associates, holds 10% or more of Ebony Energy's issued securities at the time of disposal or for any 12-month period in the 24 months prior to disposal; and
- (b) more than 50 per cent of the market value of the assets of Ebony Energy is represented (directly or indirectly) by real property interests or mining rights in respect of certain resources in Australia.

If CGT applies, concessional CGT discount treatment is not available to non-Australian residents in relation to the disposal of Ebony Energy securities acquired after 8 May 2012.

13.3 Stamp Duty

If you accept the Offer you will not be required to pay any stamp duty on the disposal of your Ebony Energy Shares under the Offer, on the acquisition of Hexagon Shares under the Offer, or on a subsequent disposal of Hexagon Shares.

13.4 GST

None of the following transactions are subject to Australian GST:

- (a) the transfer of Ebony Energy Shares pursuant to the Offers (except brokerage if any);
- (b) the payment of dividends on Hexagon Shares; and
- (c) a disposal of Hexagon Shares (except brokerage if any).

- Research firm Markets & Markets estimates that the hydrogen market will expand from US\$135.5bn in 2018 to US\$199bn by 2023, with the highest compound annual growth rate in China, Japan, and Korea².
- Hexagon successfully completes \$500,000 placement to sophisticated and professional investors.

Perth, 21 December 2020: Australian energy materials company Hexagon Energy Materials Limited (ASX: HXG) (**Hexagon** or the **Company**) is pleased to announce that it has agreed terms on which to make an off-market takeover bid to acquire all of the issued capital in unlisted company Ebony Energy Limited (**Ebony Energy** or **Ebony**) (**Takeover Offer**).

The Takeover Offer involves Hexagon issuing 1 Hexagon share for every 1.32 Ebony Energy share. Following completion of the Offer and subsequent exchanges with Ebony option holders and convertible note creditors, Ebony Energy investors and those creditors will ultimately hold 23.24% of the merged entity share capital base.

As the Takeover Offer will result in a change of activities for the Company, the Company is required to seek Hexagon shareholder approval pursuant to ASX Listing Rule 11.1.2 (**Shareholder Approval**). ASX has confirmed that ASX Listing Rule 11.1.3 does not apply to the Takeover Offer.

NT blue hydrogen project

A successful takeover will provide the Company exposure to Ebony Energy's sole asset, being the Pedirka Project in the Northern Territory.

It is proposed that the Pedirka Project will host a surface gasification plant to produce blue hydrogen for export or domestic markets from coal feedstocks with 'clean' zero carbon emissions.

Ebony has undertaken a study to analyse a surface gasification plant and hydrogen converter to produce 'clean' zero-emission 'blue' hydrogen.

The next stage for Ebony is to undertake a major drilling program to establish a JORC compliant resource to underpin a prefeasibility study (PFS) to advance the Pedirka Project.

Upon the completion of a positive PFS, it is expected that a full partnership with a gasification group would be entered into to progress an 'off-take' arrangement.

Hexagon is of the view that the Pedirka Project is consistent with its strategy to become a diversified minerals explorer with a focus on clean energy opportunities and therefore presents a unique opportunity to expand Hexagon's asset portfolio and fully exploit the Company's expertise for the benefit of its shareholders.

A rapidly developing market

Hydrogen is an environmentally-friendly and cost-effective source of energy for a world which must balance the ever-growing need for energy with preservation of the environment.

Hexagon believes that the large-scale adoption of hydrogen as a fuel source will provide a significant means of reducing global carbon output, especially given that de-carbonisation will require much more than just the substitution of thermal coal.

In addition to being clean, hydrogen is a versatile energy source with applications across the transport, electricity, industrial, and heating sectors.

While there is a growing domestic demand for hydrogen in Australia, the strong demand is coming from Asia-Pacific. As well as the growing demand for hydrogen as a fuel, there is significant demand for hydrogen as a chemical in the Southeast Asia region.

Research firm Markets & Markets estimates that the hydrogen market will expand from US\$135.5bn in 2018 to US\$199bn by 2023, with the highest Compound Annual Growth Rate in China, Japan, and Korea.³
