Hexagon Energy Materials Limited (ASX: HXG)**

Webinar Rescheduling Notice: WAH₂ Clean Ammonia Project Update

Hexagon Energy Materials limited (ASX:HXG) ('Hexagon' or 'the Company') informs shareholders and interested parties that the upcoming live webinar for the WAH₂ Clean Ammonia Project, originally scheduled for 30 October 2024, has been **rescheduled to Wednesday, 6 November 2024**.

CEO, Stephen Hall, will be hosting the webinar, where he will present the latest developments on the Company's WAH₂ Clean Ammonia Project in the Pilbara.

Webinar Details:

- **New Date:** Wednesday, 6 November 2024
- **Time:** 12:00pm AEDT / 9:00am AWST
- **Registration Link:**
https://us02web.zoom.us/webinar/register/WN_keZLiL7RQr2XE6x5YYPceQ

This webinar will focus primary on the WAH₂ Project, which is central to Hexagon's clean ammonia ambitions. Stephen Hall will provide an in-depth update on the Project's progress, its strategic importance, and the potential for ammonia as a key player in the global energy transition.

Authorisation

This announcement has been authorised by Board of Directors of Hexagon Energy Materials.

About Hexagon Energy Materials Limited

Hexagon Energy Materials Limited (ASX:HXG) is an Australian company focused Future Energy project development and Future Energy materials exploration and project development.

Hexagon is developing a business to deliver decarbonised hydrogen (low-emissions ammonia) into export and domestic markets at scale, via its WAH₂ Project. The Company plans to use renewable energy to the greatest extent practicable.

Hexagon 100% owns the McIntosh Nickel-Copper-PGE project and the Halls Creek Gold and Base Metals project in Western Australia. The Company has two joint ventures on its Graphite properties.
